

# Blood Circulation Support

*Helps maintain healthy blood pressure  
& improve blood circulation*

The main ingredients of **Blood Circulation Support** and their functions:

- \* **Scutellaria baicalensis:** May contain flavonoid components which are potent free-radical scavengers and xanthine oxidase inhibitors to fight oxidative stress and support healthy cardiovascular conditions.
- \* **Viscum coloratum:** Used to maintain a healthy blood pressure level and it's also beneficial to support healthy cardiovascular conditions.
- \* **Crataegus pinnatifida:** Traditionally used to reduce food stagnancy and blood stasis. It supports blood circulation and has been used to maintain normal blood cholesterol and blood pressure.
- \* **Apium graveolens & Clerodendron trichotomum:** Traditionally used to maintain healthy blood pressure and cholesterol levels.
- \* **Valeriana officinalis:** Has sedative and relaxant actions and is used to relieve the symptoms of nervous tension and stress, restlessness, disturbed sleep patterns and anxiety .
- \* **Prunella vulgaris:** Traditional and pharmacological evidence suggests its benefit for supporting healthy blood pressure.
